LASER/INTENSE PULSED LIGHT (IPL) TREATMENTS
Our Palomar ICON Laser/IPL System is the highest quality and most effective treatment available for **PERMANENT HAIR REDUCTION** and can also be used for treatment of Pigmentation Conditions (Age Spots/Sun Damage), Unsightly Vascular Conditions (Broken Capillaries, Spider Veins, Rosacea) and scars caused by acne or previous surgery. For Hair Reduction, concentrated pulses of light are emitted directly into active hair follicles, which will first loosen the hair within the follicle and eventually disable and destroy the cells responsible for new hair growth. For Pigmentation and Vascular Conditions, concentrated pulses of light are emitted directly into the skin and absorbed by the pigment in the sun spots and the blood in visible vessels, then converted to heat. The heat dissolves the cells that create the pigment and shrinks the vessels.
